

UNIVERSITY OF GENOA DEPARTMENT OF INFORMATICS, BIOENGINEERING, ROBOTICS AND SYSTEMS ENGINEERING MASTER'S PROGRAM IN BIOENGINEERING

Thesis Project Form

Title (tentative): Dental surface analysis before and after dental bleaching agents: Micro an Nano AFM analysis

Thesis advisor(s): Barberis Fabrizio, Claudio Pasquale

E-mail: fabrizio.barberis@unige.it

Address:

Phone: (+39) 010 33 56566

Description

Motivation and application domain

Thesis will be experimental and supported by an ongoing research project. Active application in lab activity is required.

General objectives and main activities

The thesis will be focussed over the surface analysis of dental surfaces before and after attack by bleaching agents. Optical Microscopy as well as AFM analysis will be performed after bioreactor performed attacks in order to define the surface staus after bleaching and whitening chemical agents

Training Objectives (technical/analytical tools, experimental methodologies)

Experimental methodologies

Place(s) where the thesis work will be carried out: DICCA/DIBRIS
