

Thesis Project Form

Title (tentative): Evaluating the influence of cognitive and physical demands on wrist proprioception and fatigue

Thesis advisor(s): Casadio Maura, Jacopo Zenzeri (ReWing) Michael Holmes (Brook University)

E-mail: Maura.Casadio@unige.it

Address: Via Opera Pia 13, 16145 Genova (ITALY)

Phone: (+39) 010 33 52749

Description

Motivation and application domain

Rehabilitation Robotics. Ergonomics. NeuroMechanics: Neural control of the hand, Forearm muscle fatigue and performance, Sensorimotor assessment of hand function

General objectives and main activities

The aim of the thesis is the development of a cognitive and physical loading paradigm to fatigue the neuromuscular system and to develop sensorimotor evaluations of wrist function

Training Objectives (technical/analytical tools, experimental methodologies)

Programming of wrist robotic device for study design. Recruitment, data collection, processing and analysis. Integrating electromyography and other signals with robot.

Place(s) where the thesis work will be carried out: Brock University: Department of Kinesiology; Neuromechanics and Ergonomics Lab.

Additional information

Maximum number of students: 2

Financial support/scholarship: possibility to apply to extra eu scholarship
